14. Where relevant we maintain records of the patient's consent to treatment, or the consent of their next-of-kin in order to be able to prove that the patient (and/or parent/guardian/next of kin) has given informed consent to treatment to secure evidence in the event of a civil claim, criminal prosecution, insurance claim or complaint.
15. To support NHS Test and Trace (which is part of the Department for Health and Social Care) in England, we have been mandated by law to collect and keep a limited record of staff, customers and visitors who come onto our premises for the purpose of contact tracing.

By maintaining records of staff, customers and visitors, and sharing these with NHS Test and Trace where requested, we can help to identify people who may have been exposed to the coronavirus.

As a customer of Bourne Acupuncture you will be asked to provide some basic information and contact details. The following information will be collected:

- a) the names of all customers or visitors, or if it is a group of people, the name of one member of the group

- b) a contact phone number for each customer or visitor, or for the lead member of a group of people
- c) date of visit and arrival time and departure time

The venue as the data controllers for the collection of your personal data, will be responsible for compliance with data protection legislation for the period of time it holds the information. When that information is requested by the NHS Test and Trace service, the service would at this point be responsible for compliance with data protection legislation for that period of time.

The NHS Test and Trace service as part of safeguarding your personal data, has in place technical, organisational and administrative security measures to protect your personal information that it receives from the venue/establishment, that it holds from loss, misuse, and unauthorised access, disclosure, alteration and destruction.

In addition, if you only interact with one member of staff during your visit, the name of the assigned staff member will be recorded alongside your information.

NHS Test and Trace have asked us to retain this information for 21 days from the date of your visit, to enable contact tracing to be carried out by NHS Test and Trace during that period. We will only share information with NHS Test and Trace if it is specifically requested by them.

For example, if another customer at the venue reported symptoms and subsequently tested positive, NHS Test and Trace can request the log of customer details for a particular time period (for example, this may be all customers who visited on a particular day or time-band, or over a 2-day period).

We will require you to pre-book appointments for visits or to complete a form on arrival.

Under government guidance, the information we collect may include information which we would not ordinarily collect from you and which we therefore collect only for the purpose of contact tracing. Information of this type will not be used for other purposes, and NHS Test and Trace will not disclose this information to any third party unless required to do so by law (for example, as a result of receiving a court order). In addition, where the information is only collected for the purpose of contact tracing, it will be destroyed by us 21 days after the date of your visit.

However, the government guidance may also cover information that we would usually collect and hold onto as part of our ordinary dealings with you (perhaps, for example, your name, date of birth and phone number). Where this is the case, this information only will continue to be held after 21 days and we will use it as we usually would, unless and until you tell us not to.

Your information will always be stored and used in compliance with the relevant data protection legislation.

The use of your information is covered by the General Data Protection Regulations Article 6 (1) (c) – a legal obligation to which we as a venue/establishment are subject to. The legal obligation to which we're subject, means that we're mandated by law, by a set of new regulations from the government, to co-operate with the NHS Test and Trace service, in order to help maintain a safe operating environment and to help fight any local outbreak of corona virus.
